THERMAL CENTRE

HOT SPRING WATERS AND MATURE MUD FOR YOUR HEALTH.

The thermal water containing bromide and iodide salts is drawn at a temperature of about 87°C, enriched with mineral salts and trace elements. It is used in the maturation process of thermal mud and is especially recommended for therapeutic bathing for the alleviation of contractures, osteoarticular conditions and extra-articular rheumatism; it is also utilised in the inhalations area to treat respiratory tract conditions and in the prevention of infectious flare-ups.

The "mature" mud in special tubs, in direct and constant contact with thermal water, sunshine and air: a certified process that transforms it into a proper patented medicine, an **anti-inflammatory, pain-killing, muscle relaxing and revitalising treatment**.

ANTI-INFLAMMATORY ACTIVE INGREDIENTS IN THE EUGANEAN THERMAL MUD BATHS

The European Patent No. 1571203 protects and guarantees the presence in thermal mud of numerous active ingredients, naturally produced during the ageing process when correctly regulated. Scientific research at the Pietro d'Abano Thermal Studies Center, owner of the patent, has allowed identifying them and shown the efficaciousness in treating chronic and degenerative inflammatory pathologies, in particular of osteoarticular origin.

TRADITIONAL THERMAL TREATMENTS

Our proposals of thermal treatments refer to a cycle of mud applications with thermal shower and ozonized bath, reaction massages (14 min.), usage of bathrobe for the whole stay.

Please note that ozone in the thermal bath is included in the price of the package and cannot be deducted.

The accommodation fee is excluded and must be added to the treatment package price.
